

## Other Products and Services we offer

**PatchMap DisPatch™** is Oil & Gas specific mapping served up on Garmin's **Mapsource** software engine; to be used both on **PC** and on **Garmin GPS** units. This tool makes directing / routing crews (or yourself) to locations a snap! \*\*\* Favorite of **Service Companies** big and small: hotshots, salesmen, truckers, oilfield workers and **individuals**: quad and sled adventurers, hunters, geocachers.

**PatchMap Ozi™** is Oil & Gas specific mapping served up on **OziExplorer's** software engine; to be used both on **PC** and on **PocketPC** operating systems. This tool allows **field projects** to be **designed** and **shared** with ease; even viewed in **3D**; several third party tools available \*\*\*Favourite of **biologists, geotechs, surveyors, consultants, inspectors, environmental field reporters, emergency zone planners and loggers.**

**PatchMap™ (Paper) Maps** for all of Alberta. **Wall Map** layers include: **Township grid, Wellsites, Facilities and Pipelines, Detailed watercourse, most accurate and up to date road data set in existence.** We can customize the maps to fit your needs. Try our new **1:35,000 topo map series which replace the dated NTS 1:50,000; increase the detail at the same time** and are printed on **water and tear resistant paper.** **New: Trucker's Maps** are similar to the Wall Maps, but are of smaller areas and fold; **excellent advertising opportunity!**

**GPS Training** yes, we do that too...we will **train** you to use this powerful technology, what it's about and how it works so that you can **fully utilize your GPS**, the maps / data on it and the data that you collect with it. We provide the only **Nationally Recognized GPS Certification Course.**

**Advertise** your business in each and every GPS or digital mapset we sell with: **Your Business Name, Address, Phone Number** installed as a Routable Waypoint that will **bring customers right to your doorstep.** And now, Advertise on foldable **Trucker's Maps ... best pricing around!** ... finally a real map!

## Keeping You on the Right Road

### "Never be Lost Again"

Geographical awareness brings confidence to anyone out in the real world. Even old 'paper map and compass guys' will be amazed at the ability to see exactly where they are, on the most up to date maps available... and they should be !

What people are saying about this new product:

*"It's about time. Give this guy a pat on the back ... make sure to sell some to the Conservation Officers!"*

*"All the roads, pipelines and seismic lines? That's just what I've been looking for."*

## Think about it

Outdoor mapping within Alberta and NE BC.

That means wherever your recreation takes you, there's quality mapping at your fingertips ALL the time.

If you quad, sled or hike about the countryside, you can plan and document your expedition; complete with a printed map with all the tracks.

Users of our products say "Quadding just feels safer when you can see where you are going and where you've been. Without a real map in the background it's just a bunch of dots in the middle of nowhere."

and "With these maps as a backdrop I will probably look at going to other areas, now that they don't like us going into the headwaters of the Kakwa."

Isn't it time to set the new high-mark? There's only one worth buying... come see for yourself.

*Everyone should have these maps on their Garmin ... they would get lost much less often!*

## How does it work

**Garmin**, a GPS manufacturing company, builds some of the best – most user friendly and versatile handheld GPS units ... period.

- ❖ All newer **Garmins** have either a *micro SD* memory card or a full size *SD card* slot. The **BushMap** product contains both a *micro SD* card and an adapter to a full size *SD card*.
- ❖ **Place the memory card into your GPS and instantly** have all that **BushMap™** has to offer.
- ❖ Everywhere you move your cursor on the **GPS** the **background states** the **Wildlife Management Unit** that it's in.
- ❖ The **boundaries of the WMUs** are along roads & railroads, along river banks and often **follow the township grid** ... in the **middle of nowhere**. These **boundaries are all seen in the mapping**.
- ❖ The **Summer Issue** contains **Alberta (or BC) Fishing Regulation** Information.

In order for the GPS to be of any significant use to you, you need good Mapping. **That's where we come in.**

We have an inherent understanding of the issues experienced by outdoorsmen, as we have spent most of our years working in and enjoying the outdoors.

*We actually invite requests so that we can continue to have the best system money can buy.*

## What makes our maps special

**All Industry roads.** What that means: Whether the roads are Oil and Gas or Logging Company roads, they are in these maps.

**Km. posts and Radio frequencies.** This simply makes sense doesn't it ... Why would we **not** do it?

**All wellsites and township grid.** All wellsites are shown on the maps. The Township grid identifies where you are at any point in time. There is also a searchable point in the middle of each section.

**Pipelines.** All pipelines are in the map and whether it's a wellsite or pipeline, if there is any sour content, they reflect that. Find someone else who identifies sour facilities by sight.

**Compressor and Plants stand out.** They too are visibly identifiable. We try to think about 'Safety' as well as simplicity and convenience.

**Contour lines.** Indicate the topographical nature of the map contents. See hills and creek valleys.. and how steep they are before venturing out.

**Seismic lines.** These older access routes are easily seen in the map, allowing possible access routes into otherwise unreachable locations.

**Ease of use.** Just plug the memory card in and instantly the maps appear!

These maps contain a compilation of the most accurate and appropriate information available. No need to switch map series. Always know where you are and what to expect around the next corner or over the next hill.

If you use Garmin Rinos remember to use Channel 19 in an emergency as STARS has been encouraged to monitor that channel for flight directions!
